H. L. BIDWELL'S
Highly Improved Patent **ATHANOR**
COOKING STOVE.

THESE Stoves have recently been so improved as to warrant their superiority to any now in use, either in New-York, or any other market in this vicinity. For saving of fuel, and convenience of cooking, they will bear the closest examination. There is no Stove now in use having four boiling places upon which the fire can be brought to act so directly, so conveniently, and with so much economy as in this. The oven is of a conical form, thereby throwing the heat uniformly through it, and baking like a brick oven. It is large, within the stove, constructed so as to turn more or less around it, as is needed, and being whole, is perfectly clean from any ashes from the stove—and the fire is not turned away from any of the boilers while baking, as it is in other stoves.

The above Stoves, together with two sizes of Bidwell's former Patent, are for sale by
Moses Morse & Son,
Agents for Litchfield and its vicinity.
There being three different sizes of these Stoves, with different prices, they cannot fail to please.

Also on hand, 3 different patterns of Gold's Patent, with the Rotary's, and an assortment of Parlor FRANKLINS, Fire Frames, and Box Stoves, an excellent article, which will be sold at reasonable prices—and terms of payment made easy.
